What's a Firefox OS?
Fast Startup: The Problems
Seeming Fast at Startup: The HTML Cache
Local Storage:
Okay in small doses
<link rel="stylesheet" .../>
<script ...
DOMContentLoaded!
Being Fast:
Lazy Loading and Optimized Layers
RequireJS Loader Plugins

```javascript
var fooModule = require('./foo');

var htmlString = require('text!./foo.html');

var localizedDomNode = require('tmpl!./foo.html');
```
Seeming Fast:
Preloading
Being Responsive: Workers and SharedWorkers
Being Fast: Virtual List Widgets
